

# ENERGY ACTION MONTH 2016

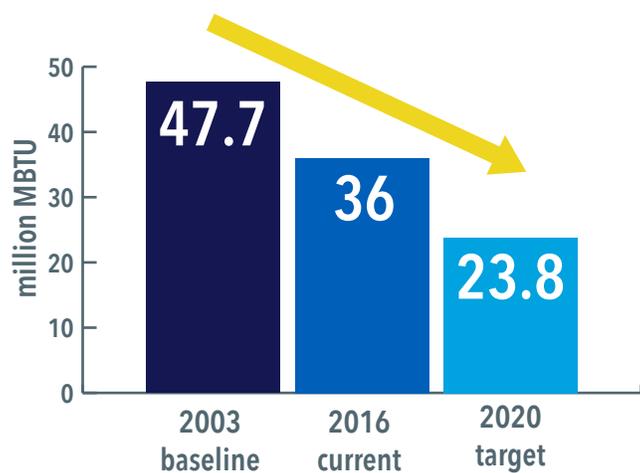

## POWER. PRESENCE.

### NAVY SHORE ENERGY GOALS

REDUCE ASHORE CONSUMPTION BY 2020 FROM 2003 BASELINE **50%↓**

**ACQUIRE 50% TOTAL ASHORE ENERGY FROM ALTERNATIVE SOURCES BY 2020**

### ENERGY CONSUMPTION TARGETS

2020 CONSUMPTION TARGET  
**23 MILLION MBTU**

Navy Installations currently consume 36 million MBTU, electricity accounts for 18 thousand MBTU, equal to 5.3 million kWh, but just one kWh is quite powerful.

### REDUCE YOUR ENERGY USAGE

WATER

FUEL

HVAC

ELECTRONICS

LIGHTING

### ONE kWh WILL POWER:

A six minute shower

A oven for half an hour

A fridge-freezer on for about three hours

A laptop all day

A broadband router for five days
