

# Energy Action Month **POWER. PRESENCE.**

**A hot water faucet that leaks** one drop per second can add up to 165 gallons a month. That's more than one person uses in two weeks.

**Placing lamps or TV sets near your thermostat** can cause the air conditioner to work harder than necessary.

**The most efficient appliance in your kitchen is your microwave**, which uses just 1/3 of the wattage of most ovens.

**The U.S. houses 5% of the world's population**, but uses 23% of the world's energy.
